

ANSH BHARDWAJ

Platform Engineer | Data Engineer | GenAI Automation Engineer
Meerut, India | anshbhardwaj16@gmail.com | +91 8445256683 | linkedin.com/in/anshbhardwaj16

PROFESSIONAL SUMMARY

Platform & Data Engineer with 2.5+ years of experience designing and operating large-scale data platforms, workflow orchestration systems, and enterprise automation solutions. Experienced in managing 800+ production Apache Airflow DAGs, developing SQL-driven workflows and CI/CD automation frameworks, and building GenAI-powered operational intelligence and Agentic AI solutions using LLMs, Copilot Studio, and Power Automate.

EXPERIENCE

Accenture Solutions Pvt. Ltd. — Data Engineer (Management & Governance Analyst)

Sep 2023 – Present • Noida, India

- Orchestrated and governed approximately 800 production Apache Airflow DAGs, ensuring reliable execution of large-scale enterprise data workflows.
- Developed reusable AutoDAG templates to standardize pipeline creation and accelerate onboarding of new workflows.
- Automated Selenium-based test execution using Docker and GitHub Actions, streamlining CI/CD validation.
- Built a GenAI-powered Airflow Auto-Healing Framework using Copilot Studio and Power Automate to automate failure detection and remediation.
- Reduced manual operational effort by 20%, saving 50+ engineering hours per month.

PROJECTS

GenAI-Powered Airflow Auto-Healing Framework

Apache Airflow · Python · Copilot Studio · Power Automate · REST APIs · ServiceNow · LLMs

- Designed an enterprise-grade GenAI auto-healing solution for Apache Airflow.
- Automated failure analysis and remediation using LLMs.
- Integrated intelligent recovery workflows and automated DAG retriggering.
- Reduced MTTR by 20% and saved 50+ engineering hours per month.

OmniSpark – Enterprise Agentic AI Software Engineering Platform

Python · Multi-LLM Architecture · Jira REST APIs · Git · GitHub · VS Code Extension · Power Automate

- Co-created OmniSpark, an enterprise Agentic AI platform supporting multiple LLM providers that automates the complete software development lifecycle (SDLC).
- Enabled AI agents to author detailed Jira stories (or select backlog items) and autonomously handle feature branches, production-ready code generation, testing, code reviews, PR creation, continuous Jira updates, and LLM policy-gate validation through delivery.
- Built reusable AI engineering workflows to standardize software delivery and reduce manual engineering effort.
- Co-developed RAGENTS, an enterprise-grade VS Code extension providing a centralized marketplace of reusable AI agents, engineering skills, prompts, and workflows.

TECHNICAL SKILLS

Programming: Python, SQL

Data Engineering: Apache Airflow, Workflow Orchestration, Data Pipeline Management, DAG Monitoring & Governance, Databricks

DevOps: Docker, Git, GitHub Actions, CI/CD Pipelines, REST APIs, Power Automate

GenAI: Agentic AI, Multi-LLM, Copilot Studio, Prompt Engineering, Semantic Search, Vector Embeddings, Retrieval-Augmented Generation (RAG), LLM-Powered Workflows

Tools: Jira & Confluence, GitHub, ServiceNow

CERTIFICATIONS

- Microsoft Certified: DP-203 (Data Engineering on Microsoft Azure)
- Astronomer Certified: Airflow Fundamentals
- Astronomer Certified: DAG Monitoring and Auditing
- Databricks Certified: Generative AI Engineer Associate
- Microsoft Certified: GitHub GHE-300
- Anthropic CCA-F Certified

AWARDS

ACE Award, Accenture (May 2026) · Mc Star Award — Client Recognition · SOS Award — Client Recognition

EDUCATION

B.Tech — ABES Engineering College · 2023

Class XII (2019) & Class X (2017) — Dewan Public School International

LANGUAGES

English, Hindi
